To All Concerned

THE ENCLOSED IS "the book" ON WATER CONTAMINATION OF OUR THREE AQUIFERS.

ALSO ISSUES OF AIR & SOIL CONTAMINATIONS CAUSED BY CITATION (JEROME) (Wells)

THIS ISSUE HAS BEEN A CONCERN OF MINE FOR MANY YEARS WITH THE MAIN CONCERN BEING THE CHILDREN SWIMMING AND FISHING IN LIBBY CREEK FROM THE EDGE OF THE CONTAMINATION - SPENCER ROAD TO THE RIVER. THE POLLUTION IS SO BAD, IT'S MIGRATED UPSTREAM AND INCLUDES FROM LIBBY CR. WEST TO PREVENTER CR. BY ROSARIE AND ALL NORTH TO THE RIVER. Most of Libby sits on these polluted aquifers. To date, citizens are still watering their gardens & yards from contaminated wells, even those many years ago, citizens were told not to use their well water. How many citizens have not been told this since then & how many are still being exposed to day? This is a cancer.

With the children swimming at this polluted site, they are being exposed to creosote, pyrene & other cancer causing chemicals, most that penetrate the skin for exposure. I HAVE CONTACTED THE PROPER AUTHORITIES TO ADDRESS MY CONCERNs AND ALL THAT WAS DONE WAS TO ERECT A FENCE ALONG ONE SIDE OF THE CREEK. THE CHILDREN ARE STILL, TO DAY, SWIMMING & FISHING AT THIS SITE.

This is another example of Govt. not doing

Their job of protecting it's citizens. Why were my concerns ignored, maybe the same reasons is when I addressed my concerns about the asbestos contamination here.

It is a fact that this site is still contaminated, the water & aquifers are still polluted beyond human consumption and a issue of wildlife exposure is a issue and is a issue today.

This book on our water will explain all you need to know about what has happened here by those who knew & allowed this to happen to where we will never drink water from our aquifers again, not in my life time.

But I'd like to request, again, in behalf of those responsible to protect us & do what must be done to do just that, protect us, all those who don't know, who need and must know, I'd like to see a stop to swimming & fishing at this site of concern, for the kids sake, please.

Please return "the book" when your done and use what ever needed, to address the concerns here, keep me informed of ray & all done and I shall await your reply.

Thank you for your time & concern.

We must protect & save our children.

Sincerely,

Mark Cull
